

MICRO-BIOLYTICS is a leading service and solution provider for the analytical chemistry with industry expertise across Pharmaceutical, Chemical, Life Science and Food industry. We deliver comprehensive services that support our customers digitalization roadmap towards efficient, secure and reliable value chains.

Our AquaSpec™ MIRA Analyzer revolutionizes the supply chain through digital enablement of chemical analysis through Cloud, Artificial Intelligence and Big Data technologies.

You will work in agile, cross-functional project teams and will be responsible for the conception and implementation of technically challenging projects in the context of Cloud computing, Analytics-as-a-Service and Data Science.

For our MBIO Cloud Platform, we are looking for talented individuals:

## DevOps-Engineer

### Responsibilities

- Implementation of automated software deployment processes in a microservice architecture
- Full pipeline responsibility from dev to stage to production including HA and scale-up
- Administration of MBIO Cloud Platform infrastructure components
- Interface between IT and Software Development

### Requirements

- Industry experience with a focus on developing and deploying large, scalable microservice applications
- Strong knowledge of container and container orchestration tools (Docker, docker-compose, K8s)
- Familiarity with the service portfolio of cloud service providers (Azure or AWS)
- A knack for efficient and robust continuous integration and deployment processes (i.a. GitLab CI)

### Qualifications

- BS/MS in Computer Science or Engineering
- Experience working in a team utilizing an agile approach
- Strong analytical, problem solving skills, excellent verbal and written communication skills
- Strong commitment to a culture of continuous improvement

### Benefits

- Market competitive total compensation package

- Open Source contribution time
- Company sponsored tech talks (relevant professional topics) and training programmes
- Independent and responsible activity in a very attractive work environment with an innovative product
- Open spaces for working independently in varying team constellations
