

MICRO-BIOLYTICS is a leading service and solution provider for the analytical chemistry with industry expertise across Pharmaceutical, Chemical, Life Science and Food industry. We deliver comprehensive services that support our customers digitalization roadmap towards efficient, secure and reliable value chains.

Our AquaSpec™ MIRA Analyzer revolutionizes the supply chain through digital enablement of chemical analysis through Cloud, Artificial Intelligence and Big Data technologies.

You will work in agile, cross-functional project teams and will be responsible for the conception and implementation of technically challenging projects in the context of Cloud computing, Analytics-as-a-Service and Data Science.

For our MBIO Cloud Platform, we are looking for talented individuals:

Frontend-Engineer Angular/TypeScript

Responsibilities

- Implementation of efficient user interfaces in a variety of projects in the MBIO Cloud context
- User experience design for MBIO Analytical Service Apps
- Concepts for cognitive user experience and AI-powered UI optimization
- Internal and external requirements engineering

Requirements

- 1+ years of industry experience with a focus on SPA / WebApp development with Angular
- A knack for simple but logic UI and UX design
- Knowledge in CSS, Rest APIs, Swagger Gen, Graphics design
- Familiarity with common test frameworks and CI/CD

Qualifications

- BS/MS in Computer Science or Engineering
- Experience working in a team utilizing an agile approach
- Strong analytical, problem solving skills, excellent verbal and written communication skills
- Strong commitment to a culture of continuous improvement

Benefits

- Market competitive total compensation package
- Open Source contribution time

- Company sponsored tech talks (relevant professional topics) and training programmes
- Independent and responsible activity in a very attractive work environment with an innovative product
- Open spaces for working independently in varying team constellations
